Gavin Hill

Project Manager - Factory 2050

Gavin comes from a Mechanical Engineering background focused on data, with more than 9 years' experience in the data acquisition, control & monitoring, and visualization fields. He now focuses on the use of Industry4.0 digital and connected technologies to enable global companies to stay competitive in an environment which is constantly becoming more complex. Linking academic innovation to industrial implementation. Identifying gaps between the latest technology and the people who they will affect.
