

Stéphanie Portet

R&T and Logistics Engineer

Having graduated in materials science from the Polytech Nantes engineering graduate school, Stéphanie joined Daher on completion of her studies in 2008. Since then, she has contributed to the expansion of R&D across the Group and worked on many projects related to new-generation materials, such as thermoplastics, reusing thermoplastic waste and additive manufacturing. Stéphanie now divides her time between R&D and service innovation.
