

Andrew Triantaphyllou

Technology Manager, Design for Additive Manufacturing

Andrew Triantaphyllou leads the DfAM research team at the UK National Centre for Additive Manufacturing. He is responsible for capability development to support the industrialisation of AM. The DfAM team conducts research, develops design frameworks, delivers DfAM training courses and contributes to qualification standards for AM design. Andrew is a member of ASTM and BSI standards committees, is part of the ASTM Centre of Excellence management team and is on the steering committee of the EPSRC DfAM Research Network.
